## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 1-30 remain for examination.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(a) Claim 1, it is not clear what is performed by managing.

(b) Claim 1, it is not clear how data hazard is prevented.

(c) Claim 1, it is not clear what is meant by "receipt of *instruction response*".

(d) Claim 1, it is not clear what is different based on the order of receipt.

(e) Claim 5, it is not clear whether the first and second instructions require access to the same memory location in the memory resource.

(f) Claim 5, it is not clear what is the difference between the second and third tracking information.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2111

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 5-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Arnold et al, U.S. Patent No. 6,715,060, cited in the previous office action.

Arnold et al teaches the invention as claimed in claim 5 including a method of managing access to a memory resource comprising::

(a) storing first tracking information in response to a first instruction requiring access to the memory resource (col. 6, line 20),

(b) storing second and third tracking information in response to a second instruction requiring access to the memory resource (col. 8, line 6 for a second instruction),

(c) managing access to the memory resource by changing the first, second and third tracking information in one of a plurality of sequences based on an order of receipt of a first instruction response and a second instruction response (col. 8, line 39; scoreboard bits for each register corresponding to respective instructions are changed in an order of the instructions pending), and

further teaches as in claims 6-9,

(d) storing and changing the first, second and third tracking information includes storing one of first and second logical states in respective first, second and third tracking bits by setting and resetting (col. 8, lines 39 and 41) – claims 6-9.

Art Unit: 2111

6. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

7. Claims 11-30 stand allowed over the prior art of record.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth S KIM whose telephone number is (571) 272-3627. The examiner can normally be reached on M-F (8:30-17:00).
